Bilal Imran

bilalrizvi2110@gmail.com | LinkedIn | LeetCode | Kanpur, Uttar Pradesh, India

Skills

Languages: C#, Python, JavaScript, TypeScript, LINQ
Frameworks & Libraries: .NET Core, Entity Framework, Angular, React
Databases: SQL Server, PostgreSQL
AI-Assisted Development: GitHub Copilot, Claude Code, AWS Bedrock, Prompt Engineering, Tool/Function Calling
Tools & Testing: AWS, OpenSpec, xUnit, Docker, CI/CD Pipelines, Postman, Jira, Git,
Core Concepts: OOP, SOLID Principles, Data Structures & Algorithms, Agile Methodologies, Spec-Driven Development, Generative AI Integration

Work Experience

ThoughtWorks | Consultant Developer| Bangalore, India **Dec 2025 - Present**

- Engineered end-to-end full-stack features for an enterprise **automobile** marketplace, automating the ingestion of **high-volume third-party vehicle** leads and building dynamic UI components to seamlessly synchronize and display new inventory to users..
- Slashed Generative AI operational costs by **designing an intelligent URL exclusion filter**, preventing redundant LLM page scans and drastically **lowering API overhead** while maintaining data capture accuracy.
- Architected and pitched a **privacy-first AI document processing** POC as a part of the hackathon, directly to the client's group CEO, utilizing Microsoft Presidio, Pydantic AI, and Claude to map sanitized financial data to UI schemas while eliminating manual entry and **minimizing LLM costs**.
- Championed **Spec-Driven Development (SDD)** and engineered **Spec-Driven Testing (SDT)** using AI QA Agents, implementing multi-step orchestration with tool calling and context memory to automate scenario generation, accelerating ticket execution and significantly reducing manual QA scenarios generation for cross-functional teams.

Tech Stack: C#, Angular, PostgreSQL, TypeScript, .NET, AWS and GenAI.

LTIMindtree | Consultant | Noida, India **July 2024 – Nov 2025**

- Developed robust backend functionalities for a large-scale insurance domain application utilizing C#, SQL Server, and .NET.
- Contributed to the "Track Rate" feature to accurately track and calculate complex insurance formulas across all coverages.
- Optimized tracking rate efficiency by dynamically setting coverage tracks based on the specified formulas.

Tech Stack: C#, SQL Server, .NET.

GlobalLogic| Software Engineer | Noida, India **June 2022 – July 2024**

- Contributed to the development of a **Natural Resources data and analytics** project, streamlining the integration and benchmarking of emissions data using C#, .NET Core, and React.
- Developed and enhanced features for the **Lens Carbon platform**, focusing on Carbon Capture, Utilization, and Storage (CCUS) which helps to improve data insights and workflows for carbon management.

Tech Stack: C#, SQL Server, .NET Core, JavaScript, React, xUnit

Hitachi Vantara | Software Development Engineer Intern **Feb 2022- June 2022**

- Worked with the App Engineering team to handle different requirements of projects.

Tech Stack: Salesforce, Apex.

Verzeo| ML Intern **Oct 2020- Nov 2020**

- Trained machine learning models, performed data preprocessing, and developed a movie recommendation system.

Tech Stack: ML, Python, Bootstrap, Flask

Academic and Extracurricular Achievements

- Certified in **AWS AI Practitioner** and **Rest API (Intermediate)** by HackerRank.
- Ranked in the top **14.11%** globally on LeetCode, with **650+** problems solved and a peak contest rank of **1,400.**
- Achieved **6-Star** in Problem Solving and **5-Star** in Python Programming on HackerRank.
- Certified in **Problem Solving** (Basic and Intermediate) by HackerRank.

Education

Pranveer Singh Institute of Technology, Kanpur, India **2018 - 2022**

- Computer Science and Engineering | CGPA: **7.5**

Wendy Academy High School, India

- *ISC (Class XII), Grade:* ***79.8 %*** **2016 - 2017**
- *ICSE (Class X), Grade:* **79.1 %** **2014 - 2015**
